

EXPLOITED VULNERABILITY ADVISORY: CVE-2026-85046

Summary

CVE-2026-85046 in Google Chromium V8 is being actively exploited in the wild. Type confusion in V8 in Google Chrome prior to 152.0.7977.82 allowed a remote attacker to execute arbitrary code inside the sandbox via a crafted HTML page. (Chromium security severity: High) CISA requires federal remediation by 2026-09-18; under the CRA, exploitation of an affected product must be reported within 24 hours.

What we know

- **CVE:** CVE-2026-85046
- **Affected:** Google Chromium V8
- **Exploitation:** Actively exploited, added to CISA KEV on 2026-09-04
- **Severity:** CVSS 8.8 High, Network-exploitable, no privileges required (CVSS:3.1/AV:N/AC:L/PR:N/UI:R/S:U/C:H/I:H/A:H)
- **Exploitation likelihood (EPSS):** 0%
- **Weakness:** CWE-843

Recommended action

Patch CVE-2026-85046 by 2026-09-18. If you cannot patch immediately, restrict network access to the affected service now (segment it, put it behind a VPN, or take it offline) until you can patch. If you ship an affected product, be ready to file the CRA 24-hour report the moment you find it exploited.
